Elliott Foster

Austin, TX | **elliottf@codebrews.com**

Executive Summary

Experienced software engineering leader driving cloud-native delivery, operational excellence, and team growth across complex product portfolios.

Education

The University of Texas at Dallas
B.S., Computer Science - May 2007

Experience

Optum

Eden Prairie, MN (Remote)
Director, Software Engineering August 2024 - present

- Led the transition from legacy risk systems to Optum Risk Analytics, delivering $2.5M in incremental savings and $7M in annual ongoing savings.
- Executed a cloud-to-cloud AWS migration with zero customer downtime while integrating Episource engineering teams into Optum.
- Established AI-first delivery practices and data quality controls to improve engineering effectiveness and compliance.
- Partnered with leaders to align operating practices, governance, and roadmap execution across a 120-person engineering organization.

Episource

Gardena, CA (Remote)
Director of Engineering August 2022 - August 2024

- Implemented DORA-based engineering KPIs and a continuous improvement operating model across the department.
- Introduced DAST testing and LaunchDarkly-based feature management to improve release quality and delivery speed.
- Completed HITRUST certification and strengthened security and compliance across the product portfolio.
- Delivered the first-to-market CMS-HCC Model V28 risk adjustment solution while developing first-level managers into stronger leaders.

Software Engineering Manager / Lead Software Engineer March 2020 - August 2022

- Grew individual contributors while delivering key product enhancements for the Episource Analyst platform in React, GraphQL, and Nest.js.
- Led design and deployment of the Medicaid analytics product and drove GraphQL adoption across Episource APIs.

Four Kitchens

Austin, TX
Architect December 2010 - March 2020

- Led architecture and delivery for NBC digital products, client systems, and large-scale distributed APIs.
- Migrated NBC to a graph database and scaled API traffic from thousands to tens of millions of requests per day.
- Built high-traffic APIs for **NBC.com**, **The Tonight Show with Jimmy Fallon**, and the Saturday Night Live platform; presented the architecture at **AWS re:Invent 2019**.

New Media Broadcasting Company/ Direct2Care

Glendale, CA
Head of Web Development July 2005 - December 2010

- Led Drupal platform improvements in performance, search, and multi-site synchronization for a large content network.

Relevant Skills

AWS, React, Node.js, GraphQL, Python, MySQL/PostgreSQL, security/compliance, distributed systems, and engineering leadership.
